

# Implant Continuum

## A Movement from Theory to Practice:

There are many excellent implant training programs available both in Canada and the United States. After obtaining a solid foundation in the field of implant dentistry through several weekends of courses, countless hours of theory and some hands-on training on models, it is not always easy to start performing those procedures on your own. Many clinicians begin with simple straight forward cases, which are safe and predictable on every level. However, as time passes and the information you gained from your training fades, it becomes even more challenging to treatment plan and confidently perform more complex cases. If this sounds familiar and you would like to be part of a program that can help you achieve your goals in implant dentistry, then the Toronto Implant Continuum may be exactly what you are looking for.

## More Than A Study Club

Toronto Implant Continuum:

- Small group learning environment, maximum 12 participants
- 4 one day hands-on surgeries on your own patients
- Ongoing treatment planning and clinical support throughout the year
- You may bring your own assistants to observe, take notes and learn what they need to do in your office to set up rooms and become valuable members of your surgical team

# Devoted to the Advancement of Implant Dentistry

Dr. Berzin has been actively involved in advancing the field of implant dentistry for more than two decades. Dr. Berzin is Founder and Director of the Toronto Implant Continuum. He serves as Instructor and Faculty on the Misch International Implant Institute. He holds Diplomate status at the International Congress of Oral Implantologists.
